

Picoma is a leading manufacturer of electrical elbows, couplings and nipples (EC&N). Since 1946, we've set the standard for EC&N quality, customer service and value. Our original business, Pipe Coupling Mfrs. Inc., fabricated steel pipe couplings for the gas, oil and water industries, and rigid conduit couplings for electrical raceways. Our internal threading expertise earned us a reputation for high quality and quick-service standards, allowing us to rapidly expand our portfolio over the last 75 years.

As a division of Zekelman Industries, the largest independent steel pipe and tube manufacturer in North America and a leader in modular construction innovations, we continue our tradition of unparalleled service.

Picoma advocates for domestic manufacturing and fair trade. **We support:**

A campaign calling on business leaders across all sectors to buy local and partner with domestic organizations.

A national grass-roots initiative supporting the domestic steel industry and all the hard workers whose livelihoods depend on it.
