

Z Modular is revolutionizing modular building and services using superior steel framing components and pre-assembled material kits. Our Z Modular® Building Ecosystem offers a complete factory solution, with 80% of total project labor being completed in our factories. The ecosystem expedites planning, reduces costs and fabrication time, guarantees precision, and ensures rapid installation, enabling customers to build efficiently and at or below budget.

As a division of Zekelman Industries, the largest independent steel pipe and tube manufacturer in North America, Z Modular is committed to building better by standardizing the production process, reducing risks, eliminating waste and enhancing ROI for our customers while relying on domestic resources.

Z Modular advocates for domestic manufacturing and fair trade. **We support:**

A campaign calling on business leaders across all sectors to buy local and partner with domestic organizations.

A national grass-roots initiative supporting the domestic steel industry and all the hard workers whose livelihoods depend on it.
